TERRITORIAL.

## GRANT COUNTY

And Silver City Paid a Handsome Compliment by the Bureau of Immigration of This Territory.

A Brief Resume of the Work. The Bureau of Immigration, through its efficient sceretary, Max Frost, of Santa Fe, ans just issued a bandsome handbook of 314 pages, showing the resourc-.... NEW MEXICO | co. climate, geography, geology, history, statistics and future prospects of this Territory up to December 15, 1803. The work is embellished with tine engravings of the principal cities, mountains, valleys, mining camps, ranches, fruit farms and the numerous beautiful acenes and pleasure resorts which abound in this salabrious climate and future el-

dorado of the southwest. A flattering tribute is paid to Grant County's wealth producing resources, her incomparable smittary advantages, beautiful scenery, broad ranges, bright, rapid rivers and enterprising people. We are credited with 200,000 head of We are credited with 200,000 head of United States—for to day the United States—for to day the our ranges; an annual production of movement is national in its scope \$1,000,000 in gold bullion and \$300,000 in and interests—should unite in an

We find the following in regard to Silver City:

northern half of the county and parts | of Socorro county and Arizona are di- tional Irrigation Congress willbe ome pert door to the adway Botel. rectly tributary to it, and it outlits donrond, and enjoys the advantages accru-ing to every large supply depot Its banks, court house, hospitals, stores, public schools, hotels and other buildings of a public and semi-public charac ter would do credit to an eastern county seat. Since the opening of the Santa Rita copper mires in 1800 it has been a town site, but the energy of the last doc ade has done more for its advancement than all the previous years. Situated as it is, surrounded by mills and concentrators, almost in the very center of the mining region, its stability and prosperity are assured. Largo business blocks are built or projected, and during the year 1893 about twenty-five business houses and handsome residences were built within the city limits. It has a number of civic and social organizations.

Dakota, Texas, Utah, Washington and Wyoming.

4 Three delegates at large for each state and territory not here-tofore enumerated, to be appointed by the governor of said states and territories, or in the case of

> best character. This method of developing a water supply is worthy of a complete and technical description. Space however does not permit this. The water is stopped The use of proxies as not permit this. The water is stopped on the bed rook by sub-drains. The location is in a wide swale or shallow valley leading down from the Pines Altos towards Silver City. No water whatever runs on the surface. This underdrainage is an important factor in the economic development of the arid west. Silver City is a notable example. Not only has she an ample supply for domestic and sanitary purposes of a large city, not dependent on chance showers, but through her pumping system she is rethrough her pumping system she is re-

The court house, the hospitals, the fine blocks that line the business streets, the churches, the commodicus and com-fortable hotels, of which there are four, give the city a metropolitan air. The salubrious climate makes good the local salubrious climate makes good the local claim as a sanitarium. Situated at about 6,000 feet elevation, at about 35 degrees 15 seconds north latitude, protected by encircling mountains, all the conditions are perfect for the preservation of health or the restoration of the invalid to sound physical existence. The springs are early and winters mild, while the summers are never torrid. The latitude is the same as that of the northern coast of the Guit of Mexico, but the heat is tempered by an elevation of ern coast of the Gulf of Mexico, but the heat is tempered by an elevation of more than a mile above the sea. The air is excepted, and toe influence of the pine forests is felt like balasm in every breath. The invalid who settles here will find his interest in life reviving. He will mix with a brainy, cultured populace, and in a short time will find himself discussion, business. He will find self discussing business. He will find ground cheap and material plentiful to build a home, to which purpose the universal hospitality of the people impel him, and in a short time he will feel himself a useful member of a growing and thriving community. Silver City has a wonderfully bright future.

Dr. Price's Cream Baking Powder

National Irrigation Congress.

By the authority of the national executive committee, the fourth National Irrigation Congress is hereby called to meet in the city of Albuquerque, N. M. for the four days beginning September 16,

The present year is proving to be the most remarkable in the history of Americau irrigation. It has seen a wonderful awakening of the organization of most potential | ter. After the first great door is thrown forces for the purpose of cooperat- back and displays its glittering array of ing with the western people; the bright locks, its glass incased clocks enactment of well considered irrigration laws in eight states, and the other door almost as strong, with bolts in five of them; the recognition of it reveals three other doors. The upper the pressing nature of the problem | two are of thin steel and have no locks. by the departments of interior and Only papers and books are to be kept in agriculture under whose direction the little pockets or pigconholes which a national board of irrigation has they tuclose. been formed from officials in various departments of the government.

These splendid evidences of the triumphant progress of the irrigation cause demand a large representative and effective session of the pumpkin. And it is not only burglar the irrigation congress in 1896. A further reason for such a gathering is the fact that the presidential est amount of heat that any burning campaign of 1896 will be mangurated previous to the assembling of another session of this body, and that it is thus necessary to formulate at Albuquerque the demands which the friends of irrigation will | they are heated to a high temperature desire to make upon the great polit-

ical parties of the nation. In view of the nature of the opportunity, a program of extraordinary variety, interest and importance will be arranged, and it s anticipated that this session of previous convention at Salt Lake in 1891, at Los Angeles in 1893 an emery wheel shaves off the edges.

BASIS OF REPRESENTATION. In accordance with a resolution er 8, 1893, the Fourth Nacomposed as follows:

1 All members of the national executive committee. 2 All members of state and territorial irrigating committee.

3 Five delegates at large, to be appointed by their respective governors, for each of the following states and territories: Arizona, California, Colorado, Idaho, Kansas, Montana, Nebraska, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington

States senate and house of representatives, and each governor of a state or territory will be admitted

The use of proxies and the manper of casting the vote of delegations will be regulated in accordsace with a resolution adopted at Denver and printed on page 98 of the official report of that meet-

By order of the executive committee. [Signed] WM. E. SMYTHE. Chairman FRED L. ALLES, Secretary.

A Rose In a Descri-A quiet woman, dressed unassumingly in brown, was eating her dinner in a popular tearcom. She was a regular patron and was waited upon generally by the same girl. Today I noticed that she called the pretty little Swedish waitress to her and asked her if she intended taking a vacation. The girl said she did -next week. "Here is something to help pay your car fare," said the quiet woman in brown and slipped a bill into the hand of the waitress. I wish you could have seen the joy unatterable that flooded that girl's face when she found she held a \$5 bill. She could not believe her senses. Her eyes filled with tears, and her hand shook. "Why, I never had so much money given me before! Do you suppose she meant it?" And when somebody assured her that it was no mistake the child disappeared, fairly dancing with glee. Now, that is the sort of thing I would enjoy if I were a rich woman, wouldn't you? Doing unexpected mercies and showing benefits in surprises that should take away one's breath. There are plenty of secondhand clothes and soup ticket charities. Now let us have the truck sharity that comes as the lightning dom out of the ploud when no man listeth!-

THE MODERN SAFE.

AN UP TO DATE FIREPROOF AND BURGLAR PROOF DEPOSITORY.

akillful Workmannlip Displayed In Tia Manufacture-Locks With Simple Mech- of any length in New York. anism That Are Extremely Bard to Open if You Don't Know How.

The latest burglar proof sufes and vaults are magnificent specimens of skillful workmandip. Although the popular interest in the cause doors often weigh tons, they swing as one, when some thought accested his in a high hat and patent leather shoes.

Thus armed they felt onite supe of concreation of administrative systems | and locks of its own. When this is open | said his friend.

Under them and shatting in the cash drawer there is the third door with its own lock and bolts. In this safe the size of the cash repository bears about the same relation to the size of the whole safe as a pumpkin seed does to proof but fireproof-warranted, in fact, to stand for at least 75 hours the greatbuilding could give it.

The making of a safe of this kind to s complicated and expensive operation, All the steel used comes in the form of plates from the works. After having the necessary screw holes bored in them and then tempered by suddenly immersing them in water. When they come out they are often a little twisted and warped, and have to be rolled cold and sometimes polished clean by a swiftly moving emery wheel. The noise of this operation is ear splitting and so rasping that a man with ordinary norves can the congress will be more widely hardly endure it. When the plate is peruseful and influential than the feetly level it is transferred to another machine, where it is clamped tight, and

The plates are now put together, first one of hard steel, then one of wrought iron or soft steel, and so on until the necessary thickness is obtained. From the iron the safe receives its tenacious qualities -- it cannot be cracked or brosilver ore, besides rich mines of lead, copper, opals, turquoise and other rare and valuable genetones.

Albuquerque.

Albuquerque. drill. The screws are also made of combined steel and iron. Each of them is are never directly under any other screws, so that there is no chance for a burglar to bore down through screws. The platest are also drawn very close together, for if any space was left between them a safe blower might suc-

ceed in getting his dynamite into it. Between the interior and exterior walls of the safe a large amount of hydraulic cement, combined with other ingredients, usually according to a secret recipe, is packed solidly. In case of fire the theory is that the water in the cement-about 43 per cent-will, owing to the heat of the outside covering, be come steam, partially, at least, and be driven close to the inner wall. Here it will remain and furnish a blanket impervious to heat. All the bolts are cylindrical and from an inch up to two inches

I diameter. Combination locks ar, now used exclusively. The mechanism of most of them is extremely simple. In one lock In the second control of the governor of the governor of the grant of the governor of the governor of the grant of the governor of the governor of the grant of direction the arm slips into them and on the issue. arm will not slip back. The disks are set a short distance spart and small screws with big heads are fastened at random over them. As these strike together in turning the tarablers whirl, read a man might turn the lock knob a thousand years without once getting the slits in all the tumblers together. But the man who knows just how far to turn one way and then how far back again according to the combination numbers has no trouble at all.

The combination and numbers are easily changed by changing the scrows in the disk. Many of the best safes and vaults are now being provided with time locks. Two and sometimes three clocks are inclosed in glass cases just inside of the safe door. When the door is locked, no one can open it again until the clock hands have traveled the set distance around the dial and touched a little trigger which releases the bolts. More than one clock is used, so that if one runs down the others will go on and perform their duty. In the big banks the vaults are closed about 5 o'clock in the evening and set to open a little before 9 o'clock in the morning. It is a general impression that an expert harglar can open a combination lock by listening to the clicking sounds, but dealers may it is not possible for any one to do it. If a safe owner forgets his combination, the safe has to be bored into. There is no other way of opening is -Chicago Record.

The Next Best Thing. The robber presented his glittering

have on hand." Stealing \$17,418.18, he left the place. them.

UNCLE DICK OGLESSY.

Two Characteristic Stories of the Conint Ex-Governor of Illinois. I think it was during the Cleveland-Blaine campaign that ex-Governor Oglevby of Illinois, "Uncle Dick," as

he is familiarly known, first made a stay He and a companion had a sumptuous luncheon, a lered of course by the introducer, who would up by inviting the governor to smoke. The clerk at the cigar counter handed out some fine Havana

"What's the price of these?" "Twenty-five cents," was the reply. "Holy smoke!" ejaculated the govern-"Put 'em back! Put 'em back,

quick!" "But, governor, this is my treat," "Daren't do it! Daren't do it! Put 'em back!'

"Yes, but governor"-"I tell you I daren't do it. Why, man, if they should ever find out in IIlineis that I smoked a 25 cent cigar in New York, they'd turn me out of the church, and it would ruin me politically forever. Daren't do it! Ten cont cigars are good enough for me in New York and 5 centers at home."

Uncle Dick always prided himself on his success in campaigning when called upon to reach a man's vote through his

family pride On one of his tours he passed through a country town in Illinois, when he came suddenly upon a charming group -a comely woman with a bevy of little ones about her-in a garden with a high picket fence in front of it. He stopped short, then advanced and leaned over the front gate.

"Madam," said he in his most in-gratiating way, "may I kiss these beautiful children? "Certainly, sir," the lady snawered

demurely, "there is no possible objec-"They are lovely darlings," said Un-cle Dick, after he had finished the eleventh. "I have seldom seen more beautiful babies. Are they all yours, marm?"

The lady blushed deeply. "Of course they are—the sweet little treasures. From whom else, marm, could they have inherited those limpid eyes, these rosy cheeks, these profuse curls, these correly figures and these musical

The hely continued blushing. "By the way, marm," said Uncle estimable husband that Richard J. only long enough to reach through two plates, and the screws which join the ernor x lies upon him this evening?"

> "I fear you were mistaken, sir, when you first came up. These are not my children. This is an orphan asylum !"-

> > Doctors or No Doctors.

Take haphagard a number of people of both sexes and of all ages. Divide them into communities. Let the doctors of each nation have a community to themselves-this division would be indispensable becomes the difference which exists between the treatment prescribed, say, by a Frerch and by an English dootor, has to be experienced to be believed. Let the allopathists, the homeopathists, the hydropathists, the thousand and one sets of medical faddists, all have a community of their own. Give the nostrum mongers free bands. Suffer the faith healers to work, unimpeded, somewhere, their own sweet will, and amid the whole number of the communities permit one to be set apart in which no doctor of any sort or kind, regular or irregular, shall be allowed to place a foot or have a voice. If such a test were feasible, I wonder what the result would be. Or, rather, I do not wonder-I should like to have a wager depending

I would wager that, all things being equal-position, climate, circumstances, constitution, ages—the physical history of all those communities would be pretty well of a muchness. They would all suffor from the same diseases, would beat | gin to talk in this way : them or be beaten by them, in much the same way, and would die at about the same ago. Of this I am certain-and in this I believe that the physicians themselves would be upon my side-that the medically supervised communities would be every whit as closely acquainted with pain, disease and suffering before the curtain finally fell as that one community in which no doctors were. -All the Year Round.

Decayed Wood Breeds Auta-An amateur gardener has had a great deal of trouble, year after year, with a certain bed in her flower garden. It was so infested by ants that nothing could grow there, but was invuriab., devoured by the insects. She tried every vermin destroyer known, with boiling water and other preventives, all without success. At length she found that a portion of the onter boarding of the shed which stood near this bod was decayed and needed renewal. When these boards were taken away, they were found to be alive with ants, which, being destroyed, disappear-ed from her flowers, and she has had no more annoyance from them. Often ants will get into the house closets and inte the food in the same way from some decayed wood near at hand, in which they nest. If their source is looked up when they come they usually may be unearthed and killed.

AN ACTORS' MATINEE.

GENERALLY THE SPECTATORS TEAR THEIR HOST TO PIECES.

Actors Are the Harshest Sort of Critics of Mombers of Their Own Profession-The Have Beens and Those Who Will Be Smile at the Efforts of the Star.

The soubrette came elinging to the arm of the villain. She was glorious in cigars. Uncle Dick was about to take a yellow silk waist and he was glorious quering the world, which means that they expected to "star" together some

> Nine out of ten persons in every audience which consists entirely of players have like expectations, and right here. Hes the structural weakness of the actors' matinee. Your future star bogins criticising the performance as soon as the curtain is lifted for the first act. In every movement of the star, in every word spoken by the star, he sees how much better he could have done the part if he had had the chance. As it is not half satisfying to have half of the house whispering when one is in the midst of his loftiest flight in the third not, the star's first actors' matineo is nsually his last.

> "There are three reasons for giving a professional matince," said an old manager. "First, for the self gratification of the actor, who wants his colleagues to know what tine work he is doing; second, out of courtesy to the profession, and third, to get a little advertising. The second is the most common. The manager of every production which has a long run gets many requests from actors who say they want very much to see

> it, but can't, because they're engaged. "The first thing a manager does when he determines upon a professional mati-nee is to ask the different managers of attractions playing in town how many seats they can use. Usually every person in every company wants two or three seats. Their extra seats are generally occupied by some stanch admirer of theirs who will believe that every criticism they utter upon the performance is true. This person is called 'the

sympathetic ear. "Ticket sellers complain about finicky people, who always insist upon such and such a seat. But an actor, when the seats are given to him, will come and raise a textible hullabaloo unless they are in a certain, exact spot in Dick, "may I bother you to tell your the house. I've even known a manager to send back a dozen seats because he couldn't get them six instead of twelve rows back. There's a line of would be actors waiting outside your door all day long, who want anywhere from one to twenty seats apiece, and you don't get a moment's peace until the thing's over. You don't get much peace even then." After all of their trouble to get seats to please them, many of the actors who have engaged seats do not come. If they are merely enemies of the actor who gives the matinee they present the tickets to a boarding house keeper; if they hold an actual gradge, they give

them to a bootblack. Consequently the well dressed leading man doesn't always find the persons at his elbows exactly the sort of company he would choose. The most important figure at the professional matince is by all odds the middle aged lady who is a relative of a sonbrette. The more distant the relation the more important she is. . If she is an eighth consin she expects the great doors to swing open when she is within a block of the theater, and eight ushers come out to meet her. She is fat and

comfortable looking, and she always has a temper. The old time actor, who has barn stormed it in the legitimate as long as he could, comes to see how low the stage has fallen. Maybe one of these fat and comfortable boarding house keepers is his sympathetic car. Ho tells her that things were far different when he and Booth were starring it; these young netors don't know much, and the stage has gone to the bowwows.

Between the acts the corridors swarm Acquaintances meet, and then they be-"How did it happen?"

"Don't ask me, dear boy. Bullhead Inole !!! "And, do you know, he really thinks he can not."

"Yes I suppose that he thought he was going to astonish the natives. Gad! Did you notice that entrance?" "Horrible. Conception is all wrong.

"And if I"-But they break right there-each beng inmediately convinced that the other does not know anything about it. But there are exceptions. They are usually the most prominent actors. Sometimes the hand of the star is grasped warmly between the acts, and he feels the thrill of triumph with the words: "It's immense, old man. You

are a revelation." The reporter had on his right side the sonbrette and the villain, and on his left a very nice old lady with white ourls, who had come with her son. The roung man was very critical. He picked out flaw after flaw, and reguled his mother with them. The old lady was an actress herself-a very good actress, apparently. And flually she said to this boy in a gentle saide:

Information From a Man. The bloomer dress is a pair of trousers, very buggy at the knees, absormally full at the pistol pockets and consider-

ably full where you strike a match.

The garment is out decollete at the Business Mau-Can you write short- south and the bottoms tied around the ankles or knees to keep the mice out You can't put it over your head like Applicant—Yes, sir.

"How many words a minute?"

TWO AUTOGRAPHS.

Blamasck Saw Von Mottke's Sentiment and

Went Him One Better. A young German lady of rank, possessed of great personal charms and singularly winning manners, the daughter of a prominent politician, herself now a happy wife and mother, once heguiled Moltko, who was paying a brief visit to her father's country home in Silesis, into writing something in her autograph album. This was the cutry:

Luge vergeht: Wahrheit besteht. V. MOLTKE, Feldmurschall. Which in English would be:

A lie must fail; Truth will prevail. The wily damsel now determined to bide her time until she should be able to match Moltke's dictum. When her family had again settled down in their Berlin quarters for the winter season, Prince Bismarck called one afternoon, and she showed him her book, calling his attention to what the great strategist had written, adding artlessly: "Do you think the same, dear prince? Perhaps you would like to add your comment? And on the same page? Oh, thank you so very much! And may I send the volume to the Wilhelmstrasse?" The chancellor next day returned tho book, now a greatly treasured family possession, and this is what he had written beneata the contribution of his col-

league: Wohl weiszich, dass in jener Welt Die Wahrheit stets den Sieg behals. Dech gegen Luge dieses Lebens Kampft sellsst ein Feldmarschall vergebons. V. Brananca, Reichskansier.

Very roughly Englished, the chancellines might run something like

In fature worlds, beyond the pale,
The truth is strong and shall prevait.
But 'gainst our muniane lies, 'tis plain,
Field marshals even fight in vain. -Westminster Ganotte.

Many times it has happened that a great and costly war has been brought about by an incident trivial and aven ridionlous. Thus the war of the Spanish successsion is said to have been caused through a glass of water. A lady, Mrs. Masham,

was obstructed by the Marquis de Torey. A slight scuffe ensued, and the water was spilled. The marquis thereat took offense, and had feeling ensued between the English and French courts, with the ultimate result that a war was declared.

was carrying a glass of water when sho

The campaign cost France many es-vere battles- ris, Blanheim, 1794; Ramillies, 1707; Audenarde, 1708, and Malplaquet, 1709. Quite as absord in its origin was the

war that took piace during the com-monwealth of Modena. A soldier stole a bucket from a public well belonging to the state of Bologua. Although the value of the article did not exceed a quarter, its annexation was the signal for a fierce and prolonged

Henry, the king of Sardinia, assisted the Modenese to retain the bucket, and in one of the subsequent battles he was made a prisoner. The sucket is still exhibited in the tower of the esthedral of A third instance of a war resulting from a trifling cause was that between Louis VII of France and Henry II of

The archbishop of Rouen decreed that no one should wear long hair apon their heads or chins. Louis submitted to the decree, whereupon his wife, Eleanor, rallied him upon his appearance. A quarrel ensued, which resulted in the dissolution of the marriage and Elea-

nor's marriage with Henry. By this marriage the broad domains in Normandy formerly belonging to Louis passed into the possession of Henry, Louis, hotly accused, made an attack on Normandy, and henceforth, for nearly 100 years, arose those bloody and devastating wars which cost France upward of B,000,000 of lives -
